

# Loading stations for Vanderlande

Marco has during last years delivered around 300 scissor lifts to Vanderlande Spain .

The lifts are used as loading stations for different kind of goods which manually should be transferred to a connecting conveyor.

The scissor lifts enables the operators to always work in the right height when manually picking the goods from the pallets.

The model in question is M1 010090-D1 with a capacity of 1000 kg and a platform size of 1350x1000 mm to be able to fit different pallet sizes.
